Professional Accounts Margin Rates

Important Notice - Margin Rate Update (Effective 22 August 2026)

As an OANDA Australia Professional client, please note that margin rates have been updated across all Professional account types. OANDA One (MT5 / Universal Platform) now uses a tiered margin structure. This document sets out the updated rates and includes worked examples showing how the tiered structure applies in practice.

1. Key Differences Between Updated Professional Account Types

Feature	OANDA v20 Pro	OANDA v20 Pro Plus	OANDA One (MT5)
Margin structure	Flat rate per instrument	Flat rate per instrument	Tiered by position band
Max leverage (Forex)	Up to 200:1	Up to 500:1	Up to 500:1 (Tier 1)
Position limits	Fixed unit cap per pair	Fixed unit cap per pair	Volume-based tier thresholds (USD)
Larger positions	contact sales-anz@oanda.com	contact sales-anz@oanda.com	Larger positions possible via tiered structure
Margin calculation	Single rate x full size	Single rate x full size	Per tier on each band

2. Action Required - Verify Your Margin Rates

OANDA One margin rates are independent of OANDA v20 rates. We recommend you verify the rates for your instruments before trading on any platform. This document contains the full rate schedules for:

- OANDA v20 Professional accounts
- OANDA v20 Professional Plus accounts
- OANDA One (MT5 / Universal Platform) Professional accounts - including full tier structure

All rates are for Professional clients of OANDA Australia. These are static margin calculations. Trading CFDs carries a high level of risk.

How OANDA One Tiered Margins Work - Worked Examples

On OANDA One, margin is calculated using position size bands called tiers. Each tier has its own margin rate, which applies only to the portion of your position that falls within that band. When your position grows beyond a tier limit, the next tier rate applies to the additional amount only - the lower tiers are not recalculated. The tables below compare the same positions across all three account types. Note: v20 Pro Plus has a lower position unit limit than v20 Pro, despite its higher leverage.

Tier	Position band (USD value)	Leverage	Margin rate	Max margin on tier portion
Tier 1	$0 - $3,000,000	500:1	0.20%	$0 - $6,000
Tier 2	$3,000,001 - $6,000,000	200:1	0.50%	$0 - $15,000
Tier 3	$6,000,001 - $10,000,000	100:1	1.00%	$0 - $40,000
Tier 4	> $10,000,000	33:1	3.03%	On the excess

Tier thresholds shown are for EUR/USD. Thresholds differ by instrument - see the full rate tables below.

OANDA One (MT5 / Universal Platform) - Tiered Margin Rates

Margin is calculated per tier. Each tier's rate applies only to the portion of the position that falls within that tier's band. The rates for lower tiers do not change as the position grows.
